Jim & Bob

This is to follow-up on our recent discussion at the Project Manager's meeting. EPA's proposed meeting objectives and information that should be provided prior to the June 22, 2011 FS Key Elements check-in meeting are attached. Also attached is some background and perspective on the process and additional information that our technical staff, consultants and partners have initially identified as critical to our understanding of the details of the alternatives screening and evaluations. This information is being provided as a starting point in planning the meeting, and to help frame our discussions as we finalize the agenda.

We look forward to working with the LWG to ensure that the meeting is productive and consistent with these objectives. Please let us know if you have any questions.

Chip
